

CASPER

The Future of Digital Money - Whitepaper v1.0

A Solana-based digital asset ecosystem designed to connect cryptocurrency, decentralized swaps, governance, and future real-world spending.

Blockchain	Solana
Token Symbol	CASPER
Total Supply	1,000,000,000
Decimals	9
Presale Range	40 SOL - 80 SOL
Presale Deadline	31 July 2026 at 16:00 CEST
Presale Address	FaLaZWMXQRUWEs9Nt2oFt3eRBh5TbBMCT3MNCZw98oPr

Important: Casper Card, Casper Swap, staking, governance, and other ecosystem functions are planned products and should not be treated as live until officially released.

1. Executive Summary

Casper is a next-generation digital asset ecosystem designed to make cryptocurrency practical for everyday life. Built on Solana, Casper combines a native token, planned payment card, decentralized swap platform, governance, treasury support, and future staking opportunities.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

2. Vision and Mission

The vision is to create a globally recognized digital currency and ecosystem that empowers users with financial freedom, low fees, simple transfers, and real-world utility. The mission is to bridge crypto ownership with daily spending and useful financial products.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

3. Why Solana

Solana is selected for its speed, low transaction costs, established wallet ecosystem, and suitability for consumer-facing digital payments and trading applications.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

4. Casper Token

CASPER is the native utility token intended to power transaction payments, swap fee reductions, premium ecosystem access, governance participation, incentives, and future staking.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

5. Casper Card

The planned Casper Card is intended to allow users to spend Casper-related assets in real life through future partnerships with leading payment networks. Development includes partnership integrations, card testing, conversion systems, and rollout preparation.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

6. Casper Swap

Casper Swap is a planned decentralized exchange and swap platform focused on low fees, fast execution, and a smooth multi-chain user experience. Revenue may be generated through swap fees while maintaining competitive costs.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

7. Ecosystem Components

The Casper ecosystem consists of the Casper token, Casper Card, Casper Swap, governance, and treasury. These products are designed to work together rather than as isolated features.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

8. Token Utility

Planned utility includes transaction payments, swap fee reductions, premium ecosystem features, governance participation, ecosystem incentives, and future staking opportunities.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

9. Token Details

Token name: Casper. Symbol: CASPER. Blockchain: Solana. Total supply: 1,000,000,000 CASPER. Decimals: 9.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

10. Tokenomics

The proposed allocation is 40% private sale, 50% public sale, and 10% team allocation. The structure prioritizes broad public participation while retaining a limited team allocation for development and operations.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

11. Team Vesting

The 10% team allocation is proposed to have a six-month cliff, 24-month vesting period, monthly vesting frequency, and linear release after the cliff.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

12. Private Sale

The source project brief lists a 40% allocation, an indicative fully diluted valuation of \$50,000,000, and an indicative price of \$0.05 per CASPER. The current presale accepts contributions between 40 SOL and 80 SOL.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

13. Public Sale

The source brief lists a 50% allocation, an indicative fully diluted valuation of \$75,000,000, and an indicative public price of \$0.075 per CASPER. Final sale mechanics should be announced through official channels.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

14. Presale Participation

The current presale address is FaLaZWMXQRUWEs9Nt2oFt3eRBh5TbBMCT3MNCZw98oPr. The minimum contribution is 40 SOL and the maximum is 80 SOL. The sale ends at 31 July 2026 at 16:00 CEST. Participants should only send from decentralized Solana wallets they control.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

15. Revenue Model

Casper's planned revenue model includes Casper Swap fees, Casper Card interchange and conversion revenue, and ecosystem revenue from premium features, listings, integrations, and partnerships.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

16. Revenue Utilization

Revenue is intended to support ecosystem development, marketing and growth, partnerships and integrations, and treasury sustainability.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

17. Governance

CASPER holders are intended to participate in future ecosystem decisions. Governance may cover incentives, product direction, treasury programs, and ecosystem priorities, subject to security controls.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

18. Treasury

The treasury is intended to support long-term development, operations, marketing, audits, partnerships, and ecosystem growth. Transparent controls should be implemented before significant funds are managed.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

19. Roadmap

Private presale launch: July 2026. Public launch: five to seven days after private access. Casper Swap development: Q3 2026. Casper Card development: Q4 2026. Ecosystem expansion: 2027 and beyond.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

20. Security

Casper Swap, token contracts, vesting systems, treasury controls, and future staking contracts should undergo testing and third-party review before large-scale public use.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

21. User Onboarding

Users should install Phantom, Solflare, or another decentralized Solana wallet, buy SOL, copy the verified presale address, and send between 40 SOL and 80 SOL. Users should never share seed phrases.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

22. Competitive Positioning

Casper is positioned around a clear consumer-facing identity: fast payments, low-fee swaps, a planned real-world card, and a connected ecosystem. Its long-term success depends on execution, security, partnerships, and adoption.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

23. Risk Factors

Digital assets are volatile and high risk. Presale participation does not guarantee profit, liquidity, exchange listing, card availability, swap launch, or product completion. Users may lose some or all of their contribution.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.

24. Legal Disclaimer

This whitepaper is informational only and does not constitute financial, legal, tax, or investment advice. Features, timelines, valuations, prices, and token allocations may change. Blockchain transactions are irreversible.

Status note: features described as planned, proposed, intended, or future are not yet guaranteed to be live.
